## 1. Abstract

Our system offers one stop solution to all farmers, tool and equipment needs. Users can login into their accounts and then they will be taken to the produces offered by the website. Now they can pick what tool or equipment they want to order and add to the cart. Once they are done selecting what they require, they can simply click on check out button to pay the bill and their cart will be delivered to their houses. This can be done from any place, at any time all from the internet, thus making it easy to get there all need.

## 2. Proposed System

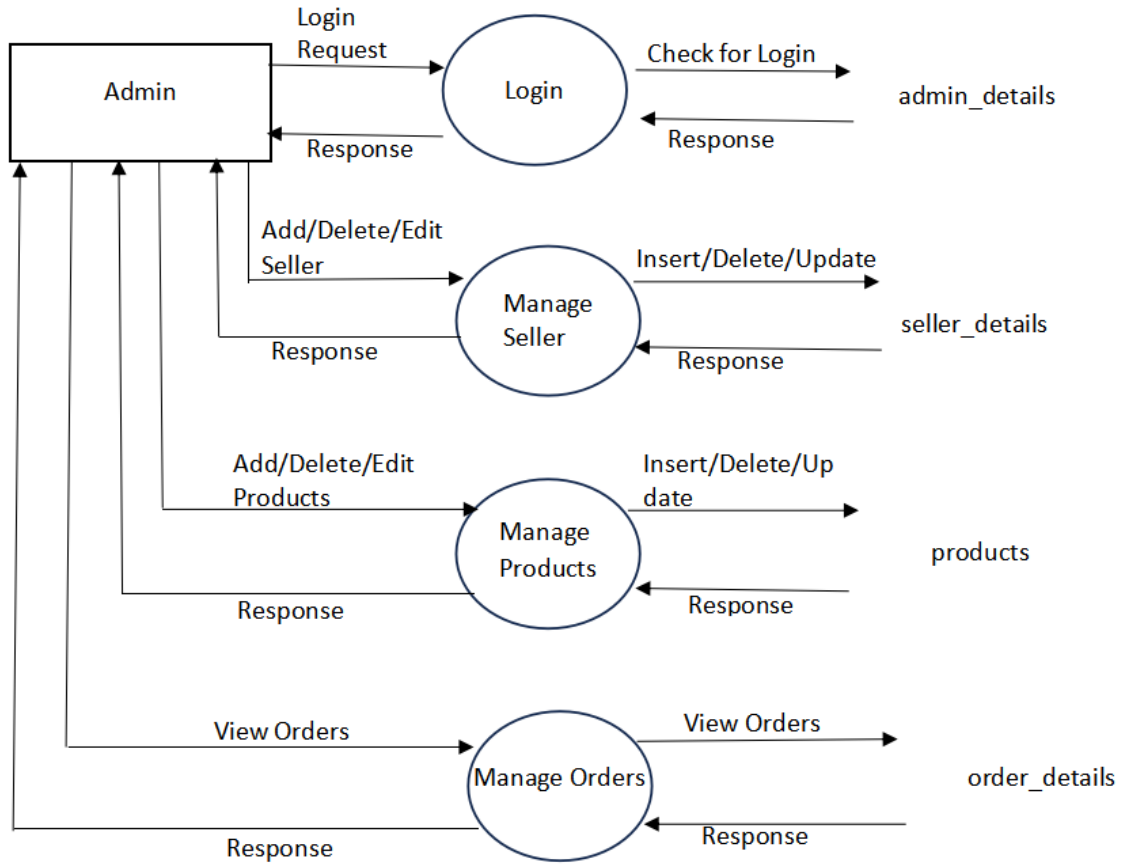

THE FARMERS MARKETPLACE, as the name suggested is about farmers. It is about connecting seller directly to the customers, thereby cutting the middle man. This ensures that the customers get tool at a very cheap price. This also ensures that all the seller get a fair chance at gaining customers so that they don't have to rely on any middle man.

## 3. Future Scope

- Rating for products
- Reviews for farmers
- Top Selling products
- Top Farmers
